PRESDWOOD MOULDINGS

Public appreciation of beauty, constantly cultivated to higher levels, demands merchandise that expresses good taste. Marsh Presdwood Mouldings have been designed to fill this need for the home as well as for commercial work. The base of these colorful mouldings is a special oil treated presdwood which is impervious to moisture. To this material is applied a glazed surface permanently integrated by the exclusive Marsh process. They are all made of heavy $\frac{5}{16}''$ stock with some items rabbetted to receive $\frac{5}{32}''$ material, which provides for membering. These mouldings are supplied in all Marlite colors and patterns. All Marsh Presdwood Mouldings are illustrated in full size.

★ MOULDINGS WITH *Color*

★ Leading merchants throughout the country have been quick to recognize the advantages of Marshtag Mouldings. Although it is a comparatively recent development, millions of feet are already enhancing the shelves of aggressive merchants. The modern design, together with the sharp clear colors, makes it a distinctive medium for decorating shelving. The tag is securely anchored in grooves and held firmly in place by tension over the convex part of the moulding. The concaved part provides a firm finger grip for easy tag insertion and removal, as illustrated below. These patented features provide sales people with a quick and positive means of pricing merchandise. Pre-finished mouldings make it possible to completely finish shelving without the usual muss and odor of paint. They are supplied in natural oak, one solid color, or in two color effects as illustrated. The standard two color moulding combinations are White Center with Black Beads, Jade Green Center with Forest Green Beads, and Cream Center with Apple Green Beads. The standard one color mouldings are White, Black, Cream, Jade Green, and Forest Green. Other combinations available on special order. Unfinished mouldings are supplied in poplar or oak, kiln dried and worked smooth. Marshtag moulding is unsurpassed as an inconspicuous decorative medium for merchandising.

WHITE ALLOY MOULDINGS

Extruded

★ The rigidity of these solid metal mouldings is a virtue of the extruding process which gives strength throughout the moulding that will withstand more than ordinary abuse. They are designed to member into each other filling practically every need for decorative construction. The simplicity of the moulding contours is attuned to the times, and enables the designer to breathe new inspiration and utility into his creations. Almost any conceivable design can be produced whether curves or straight lines are required. Bends are easily brought about by kerfing the flanges which are concealed upon the application of Marlite. The concealed fastening is done by nailing through the flange, as detailed below. The standard finish is bright mirror polish. Also available in Alumilite satin finish for exterior and non-corrosive uses.

Snap-on

STAINLESS STEEL MOULDINGS

★ Here is a moulding of enduring beauty and charm that represents an achievement in concealed fastening. The Snap-on feature provides for the springing of a stainless steel shell over a track which has been nailed directly to Marlite, as shown on the detail. Since fitting material is simplified by this method of assembly the cost of installations is cut to a minimum, making this moulding economical as well as practical. Exceptional endurance is made possible by the steel structure of the shell and track. The amazing possibilities available by these outstanding features make this moulding a very convenient accessory for use with Marlite and other wall materials. The standard finishes are bright mirror polish and satin. Also available in Bronze, Copper, or Brass.

Kalamein AND Rolled

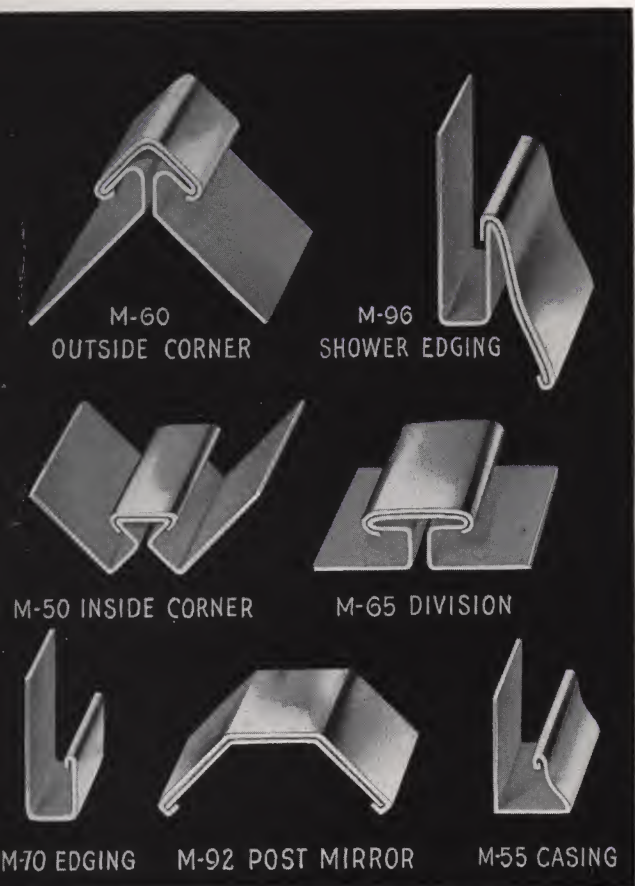

CHROMIUM MOULDINGS

★ ROLLED METAL

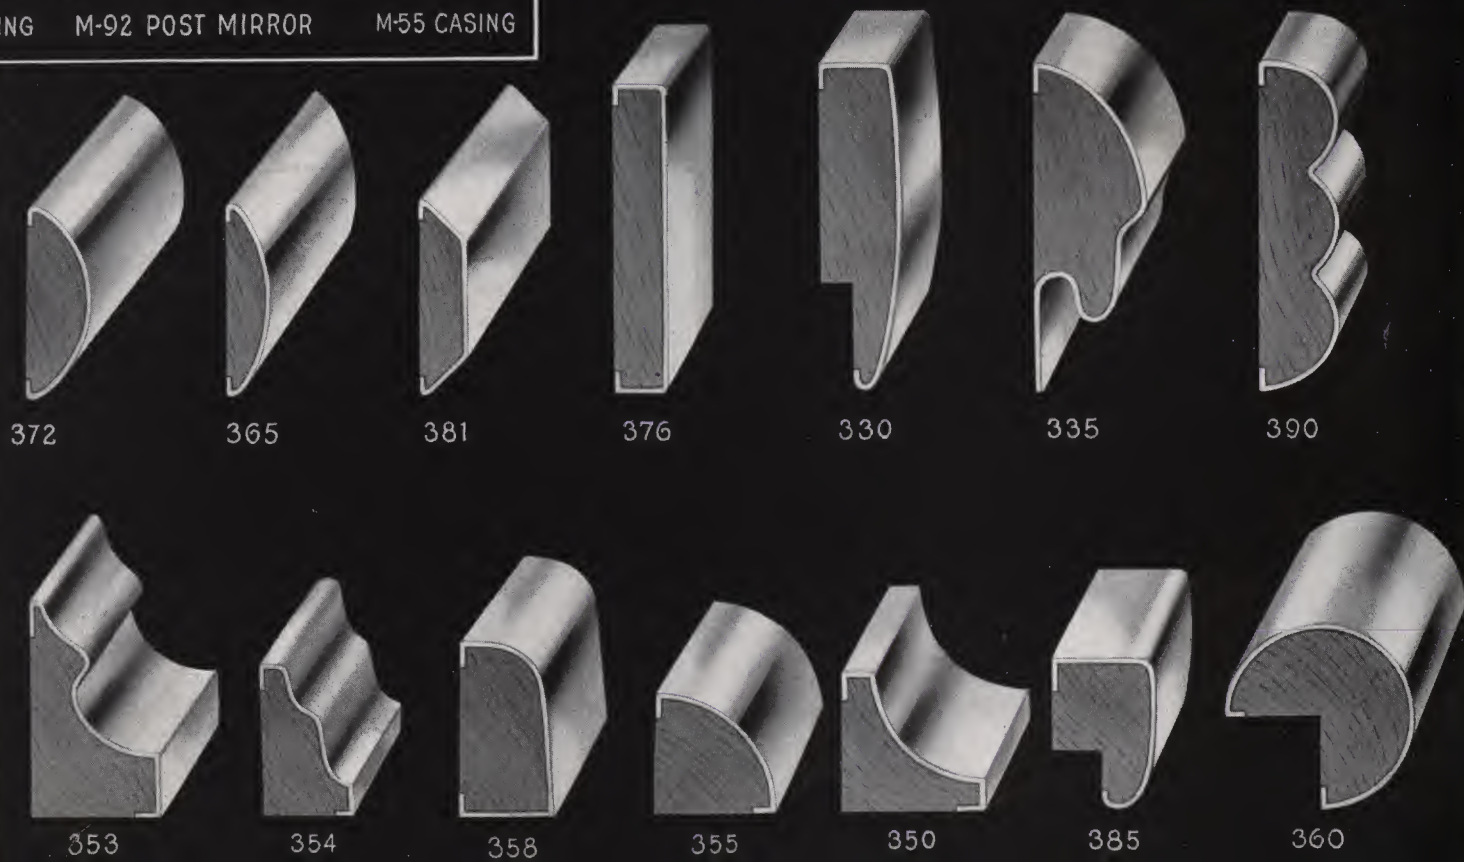

These mouldings are made of a non-rusting zinc, capped with chromium plated metal, producing a bright mirror finish adaptable for many practical uses. When the item of low cost becomes a major factor in decoration, these mouldings will meet the requirements. They can be had in plain colors to match Marlite. Available for material $\frac{1}{8}$ ", $\frac{3}{16}$ ", $\frac{1}{4}$ ", $\frac{3}{8}$ ", $\frac{7}{16}$ ", and $\frac{1}{2}$ " thick.

★ KALAMEIN

When decorative trim in bold relief is desired, it is the Kalamein (metal covered wood) moulding that fills the need. It is constructed of highest quality chromium plated metal tightly drawn over a wood core. This moulding has beauty, brilliance and durability. Many different patterns are available at a reasonable cost.

MARSH

Wonder Walls

★ Marsh Wonder Wall materials are made by the exclusive Marsh formulas and processes to produce a characteristic soil-proof surface that is beautiful, permanent and durable. It is impervious to water, acid and alkali resistant, and easily cleaned with a damp cloth. Marlite is hard, yet flexible. The large sheets are easily installed by any good carpenter with customary tools. A complete new Marsh Wonder Walls catalogue, giving more detailed information and many interior illustrations, is available from your dealer or direct from the factory.

★ **MARLITE Plain - Colors**

provide unusual possibilities in effective design. It is available in a wide range of colors; shipped in large flat sheets.

★ **MARLITE Tile-Patterns**

put within the reach of those with modest means a wall-tile treatment where tile effects are desired.

★ **MARLITE Wood-Patterns**

retain the age old beauty of wood in their faithful reproductions of fine veneer panels of rare wood.

★ **MARLITE Marble-Patterns** are especially appropriate when dignified wall effects are desired. They are true reproductions of rare marble at a fraction of the cost.

MARSH MOULDINGS

A COMPLETE MOULDING LINE

Wood, Presdwood, White Alloy, Stainless Steel, Chromium, Copper, Brass, and Bronze . . . as illustrated in full size on the preceding pages . . . designed for utility as well as for beauty.

MANUFACTURED TO QUALITY STANDARDS

These mouldings meet specific requirements by virtue of the careful planning which precedes every Marsh product. Skilled craftsmanship, acquired through the 23 years of manufacturing, makes evident even to the critical eye the high quality maintained in this complete line of mouldings.

FOR INTERIOR WALLS OF DISTINCTION

Marsh Mouldings fit every requirement demanded of a decorative moulding for interiors. They are beautiful, practical, positive, and easy to apply. These mouldings together with Marsh Wonder Wall materials make distinctive decoration a pleasant task.
